Introduction

The principle and values that Musanadah Transportation Company deal with represent who we are and what we are capable of and are without a doubt the cornerstone of our business.

Standards reflect the vision of our Founder and Chairman of the Board and are at the core of all our pursuits and endeavors ensuring their success and flourishing now and for generations to come. Our moral standards show and exemplify how we act with one another, how we value our clients and what responsibilities we carry we do so with the outmost sincerity and joy, which will hopefully be an everlasting legacy for generations to come.

The following terms are our cornerstones which we abide by and use as a standard to be always met when it comes to our values, work ethics and morality in business, although they may be hard to live up to constantly we take the responsibility to maintain an unwavering believe in living our lives and operation our businesses by them and they are:

Sincerity and Devotion

Credibility

Fairness in conduct

Responsibility

Respect

A Thirst for excellence and distinction

Efficiency and competence

Citizenship

Company Overview

We at Musanadah Transportation Company believe that running a successful business is based on certain methods which include the employee in critical decision making and taking initiative being aware of the repercussions of his actions all the while exhibiting wise leadership and abiding by the laws and regulations of the country.

For the past 40 years had significantly contributed along numerous other companies to the development of this dear country witnessing marvelous changes in Saudi Arabia and developments which are still an ongoing effort striving to develop even further ever since the time of the founder King Abdul-Aziz God or Allah rest his soul and to this day. Made possible by the great potential our group and residential compounds. A great infrastructure and great resources such as a fleet of up-to-date top engineers and technicians which play a vital role in our ability to perform to tasks at hand with the outmost professionalism, efficiency and sincerity.

History

Abdul Mohsen Bin Abdullah Bin Fahd Al-Hurish Al-Tamimi was born in the town of Alsleemi in Hail province in the Kingdom of Saudi Arabia of the first day of Rajab in the Year 1355 according to the Islamic Calendar, he was orphaned at an early age upon his father's death.

This has put in him a sense of responsibility and self-dependency. Raised in a caring and conservative environment a strong believe in Allah and the message of Islam. And as he grew older and wiser gaining knowledge and fine habits in the pure environment alongside his two elder brothers Fahd and Abdul-Rehman.

He found himself facing the harsh realities and difficulties of life early on, he did not know the playfulness of childhood or the empty fun of teenagers but developed in himself the characteristics of early adulthood and was involved in the affairs of the elders and wise men of his tribe in his hometown learning from them through lessons of experience about the virtues of manhood, virtue, honor and generosity.

Acquainted with the principles of etiquette while preserving his fine habits and customs strengthening his belief in Allah and a sense of everlasting pride regarding his origin of a glorious Arabic history.

When Abdul-Mohsen reached a stage of his life where his vision of life deepened he sensed that his hometown did not encourage nor fit his ambitions especially after he has finally found in himself the strength to leave behind his family and loved ones moving to the Eastern Region where the Oil Industry was expanding exponentially and the economy was blooming with increasing job opportunities and was in a constant state development and the acquirement of knowledge and changes in technology and world development.

He directly joined the Arabian-American Oil Company Aramco which had its doors open to national labors and employment with directions from the national leadership of Saudi Arabia, during his 10 years career he has engaged in multiple courses both practical and academic earning him a vast amount of knowledge in the field of electronics, mechanics and oil extraction and refinement and was both respected and appreciated by his supervisors both national and foreigners gaining a high qualification standard.

After establishing himself both business wise and settling down with a family of sons and daughters along with other family members who had stuck with him and moved with him after the availability of jobs. After realizing the limitations of his occupation, he looked into broader horizons, engaging in freelance business and moved up gradually. Where he first took part in the real estate field and has well established his presence in it.

He quickly had a change of mind and a drastic change in his field of profession when he came across a vital fact that has changed his view regardless of the financial income that this new field has his new philosophy of his own choosing was both a conscious and civilized one to keep up with the growth and uprising witnessed by Saudi Arabia.

This new understanding to move to investments both economic and social value at the same time and not limiting to real estate was built upon the fact: the transaction of a piece of property from one individual to another while sizeable profits are made without any mentionable effort in no time was neither his aim nor will.

He was eager to provide services to the community of which he was a part of and for these services to better the quality of life and be advantageous to everyone he dealt with, he did not tolerate that the gain and advantages be personal. As he lived amongst the people of the community giving him insight or their pain, problems and circumstances which built within him and ever living belief that the gain of money free of public interest is meaningless and does not give him a real sense of comfort and relief.

He started taking part in the charity provided by government and private sectors alike only 10 years in the field his investments were well beyond a billion Saudi Riyals, in which hundreds of employees, technicians and workers were involved in this investment activity and profits, providing their loved ones and families everywhere with what they need to face the hardships of life.

With every advancement in the field Abdul-Mohsen Al-Tamimi would feel more and more relies and joy that well exceeds that of pure financial gain. Also, as a symbol of respect to his motherland and forefathers and love to those who he had spent his childhood and life amidst his contributions weren't strictly present in projects but also in the building of a dam which protected his hometown of significant storage of water for the hot seasons. He visited his hometown often as he relished in treasured memories amidst friends, neighbors and loved ones.

It was from here that these valorous social values and ethics have made it clear to him that his investments should offer betterment to the quality of lives to as many individuals as possible from the community, with great determination he lead honorable blessed battles for the sake of a better life, greater giving and mutual benefit embodied in building holy mosques, or the construction of bridges and roads leading to and interconnecting towns and villages, building residential compounds to counter housing problems, or by building shopping complexes to add a marketing flare for the service of the citizens, or starting farms that supply the market with various fruits, vegetables and meat.

And to meet these goals and ambitions Abdul-Mohsen moved towards contracting where team effort and mutual benefit are involved.

Chairman Message

With the blessing of Allah the Almighty as well as the generosity of King Fahad Bin Abdul Aziz Al-Saud the Custodian of the Two Holy Mosques and the Crown Prince his highness Prince Abdullah Bin Abdul Aziz Al-Saud, the Vice President of the Council of Ministers, Kingdom of Saudi Arabia, has witnessed an socio-economic renaissance, by achieving huge growth in both areas.

The Saudi economy has touched a known landmark worldwide due to its great contributions by controlling all types of its national income and motivating – by God willing - the urban, agricultural and industrial renaissance towards a promising tomorrow. The real motive behind this growth and development is natural assets and resources blessed by Allah the Almighty to this esteemed country. The brilliant direction adopted by the Saudi economy is to establish as well as strengthen the private sectors, who are in turn, striving hard for the growth and development of this esteemed country.

Our group of companies, like other companies active in the private sector, was in the forefront to strengthen the pace of industrial progress in Saudi Arabia, which could be achieved by practical and constructive participation in the sustainable socio-economic development strategies. Our group has great contributions to the building construction sector by utilizing its various technical, financial and administrative resources as well as machineries to favor the agricultural and economic growth and development, and at the same time, to ensure its commercial services growth. Moreover, our contributions have favor and support in many substantial projects that are essential for integrated development and growth of the Kingdom.

Our primary objective, we are striving to achieve, is to support the country's economy and to establish its role in Arabian and global economies. Over the last few decades, we grew and flourished along with the growing development of the Kingdom of Saudi Arabia. Whatever we have put into establishing the dynamic projects all over the Kingdom, is simply an addition to the exerted efforts from our brothers and friends in both public and private sectors.

Our group expanded by development of our projects, as well as diversifying in our products. Similarly, our technicians, workers and engineers have exerted their best efforts with their utmost dedication for the betterment of our esteemed country. Therefore, with the success blessed by Allah the Almighty, we have our trade mark as well as prominent role among the major companies struggling for eco-agricultural development of Saudi Arabia, which are evidence to our love and sense of responsibility for our beloved Kingdom.

We look forward with optimism and hope our roles will be bigger in the future development plans for the Twenty First Century and aspire more growth and progress for our esteemed country under the wise leadership of the Custodian of The Two Holy Mosques and the Crown Prince.

We, Musanadah Transportation Company love to pay our compliments to those who extended their contributions to us and to our respected readers who made our dreams and efforts real as well as combined efforts of those who have been working with us for nearly forty years. We hope that it will be a sign of goodwill for those who are expecting to deal with us in future, by extending hand of our cooperation to those who have earlier worked with us and would like to deal with us again in the near future.

We pray Allah the Almighty to grant us success in this journey for the betterment of our esteemed country.

Our Experience

Musanadah Transportation Company, since its foundation in the Sixties, has participated actively in various development plan witnessed by the esteemed Kingdom, specially the projects related to the Aramco, that offers its projects in the markets through its headquarter in Khobar, and through many branches as in Abqaiq.

Why Us

- Handling all kinds of custom clearance services with complete knowledge of custom tariff and procedures by Musanadah team of professionals.
- To be present in the region as well worldwide.
- Careful loading and unloading services on time with good performance and effective warehousing facilities.
- Safe, secured and fast delivery of the products with reliability.
- Focus on customers with professional approach.
- We ensure prompt services.

Vision

The company strives to be one of the most successful transportations as well as logistics company in Saudi Arabia, with gradual improvement of our market share by offering competitive price and superior service, by using the latest technologies and expertise to achieve a sustainable high-quality growth.

Mission

Our mission is to provide the highest level of transportation services that meets the innovative needs of our customers, with safety and timely delivery services in a cost-effective proposition, with fair and competitive pricing while providing a safe workplace for employees and maintaining integrity, fairness and honesty with customers and business partners.

Our Objectives

- The safety shall be the first consideration in all operations.
- To become a leader in transportation services.
- Provide highest level of customer satisfaction care.
- Provide excellence in working conditions for our employees and participate in our community, by providing innovation and personalization to all our actions, fulfilling all our customers' requirements.
- Corporate activities shall be conducted to the highest ethical and professional standards.
- To reach a larger part of our market.

Core Values

The company aims to maintain and grow on its high profile in the market by:

Service

Maintaining service excellence Our absolutely, positive spirit puts our customers at the heart of everything we do.

People

Treating staff and customers with respect and honesty and promote diversity in our workplace and in our thinking.

Responsibility

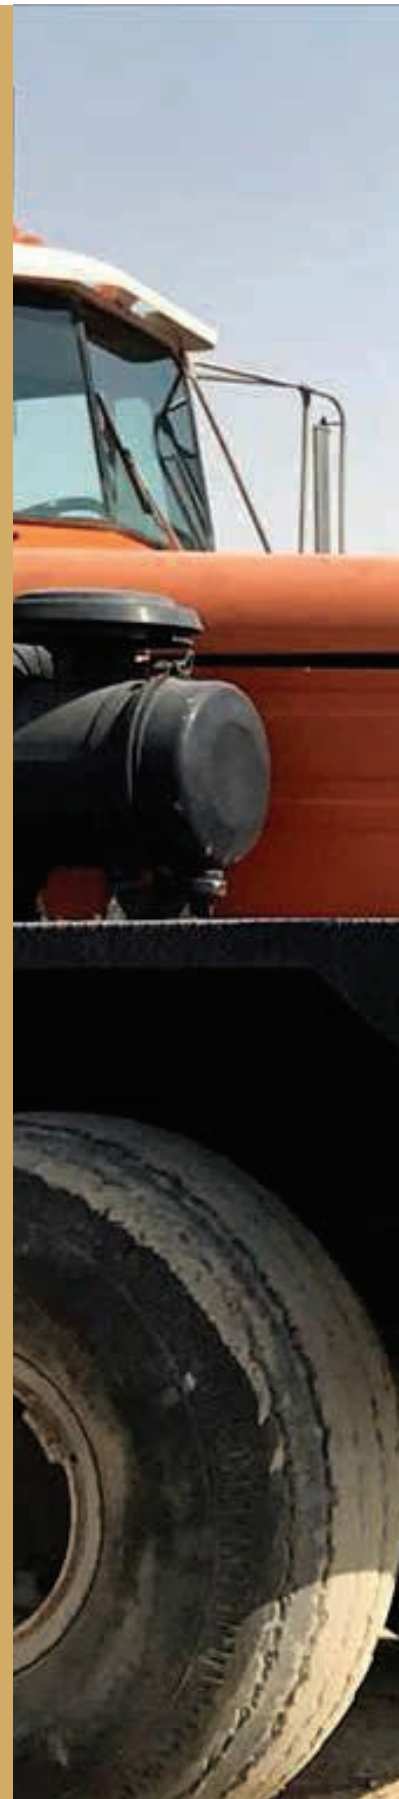

Providing superior transport solutions according to each customer's needs, safe and healthy environments for the communities in which we live and work.

Integrity

We manage our operations, finances and services with honesty, efficiency and reliability.

Loyalt

We earn the respect and confidence of Musanadah people and customers in everything we do.

Our services

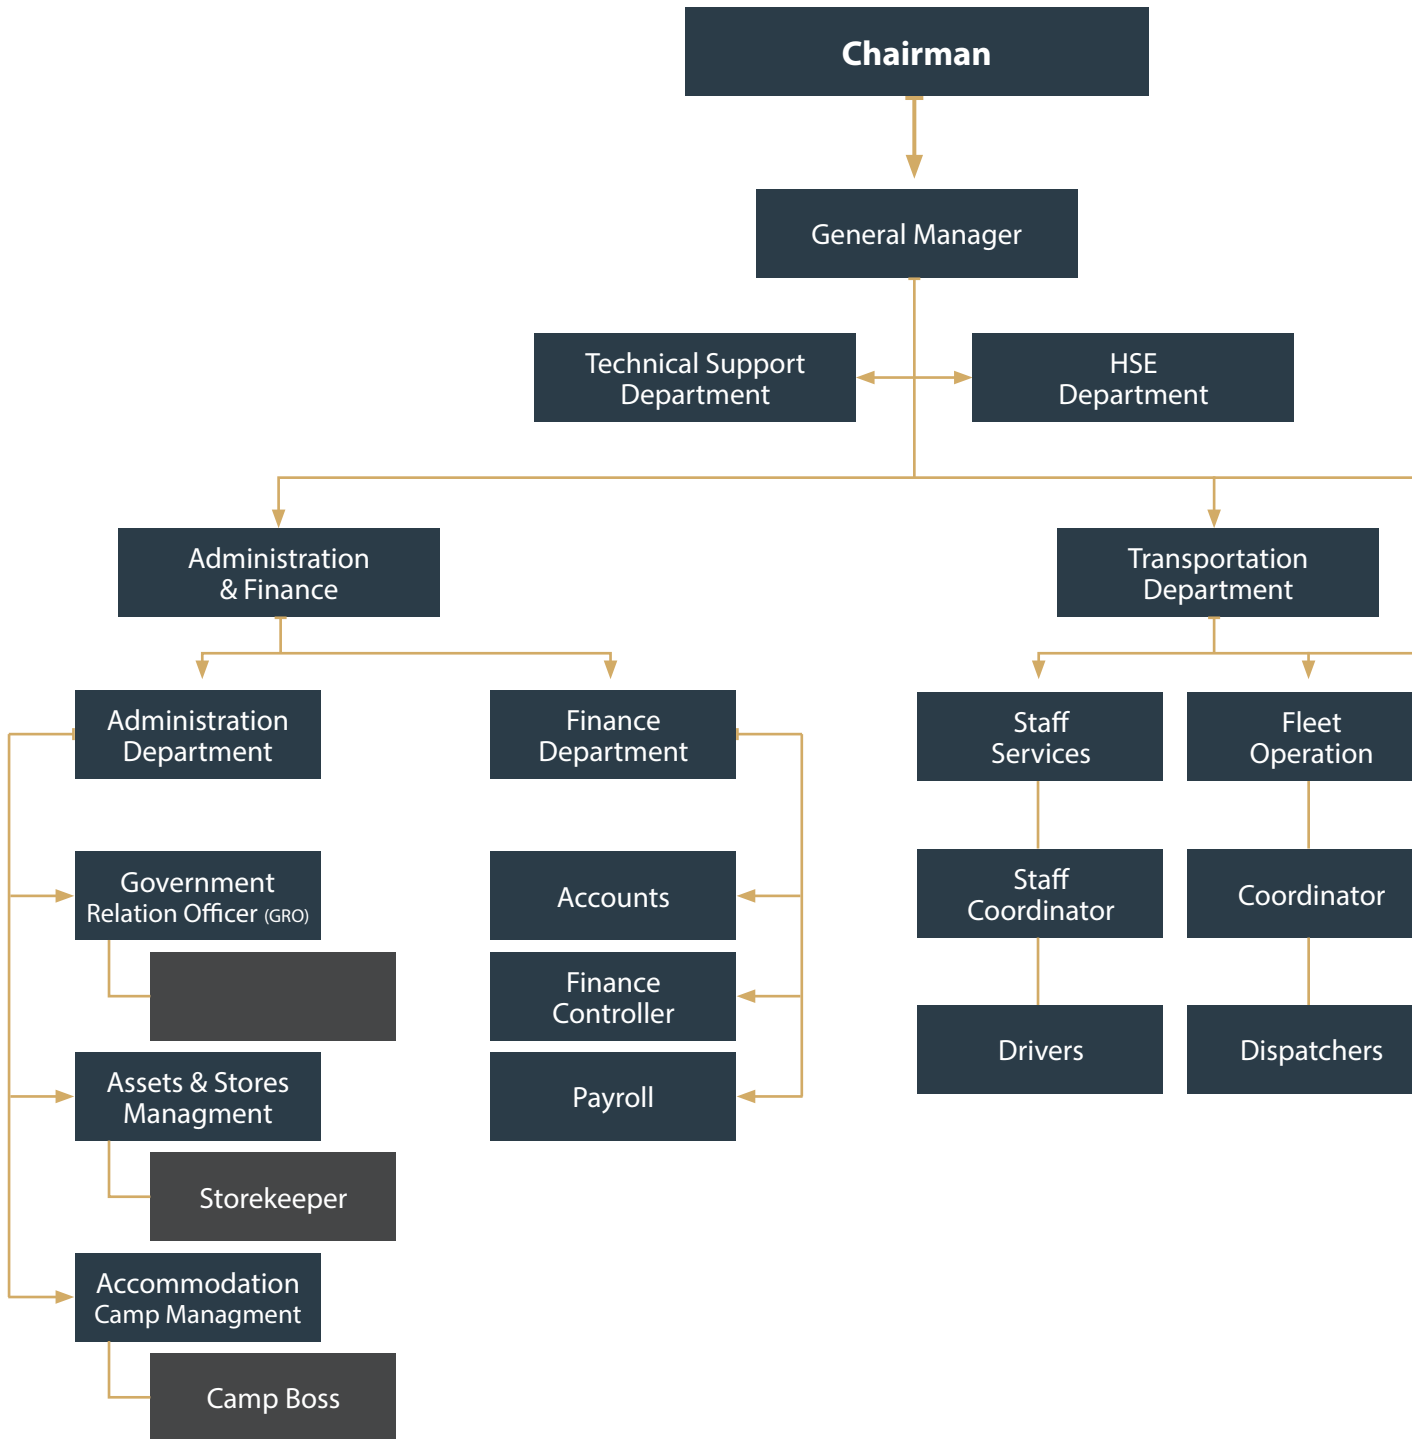

Musanadah Transportation Company has a particular focus on servicing the industrial sector, We are currently expanding our services within Saudi Arabia and aim to extend to regionally.

We offer the following services:

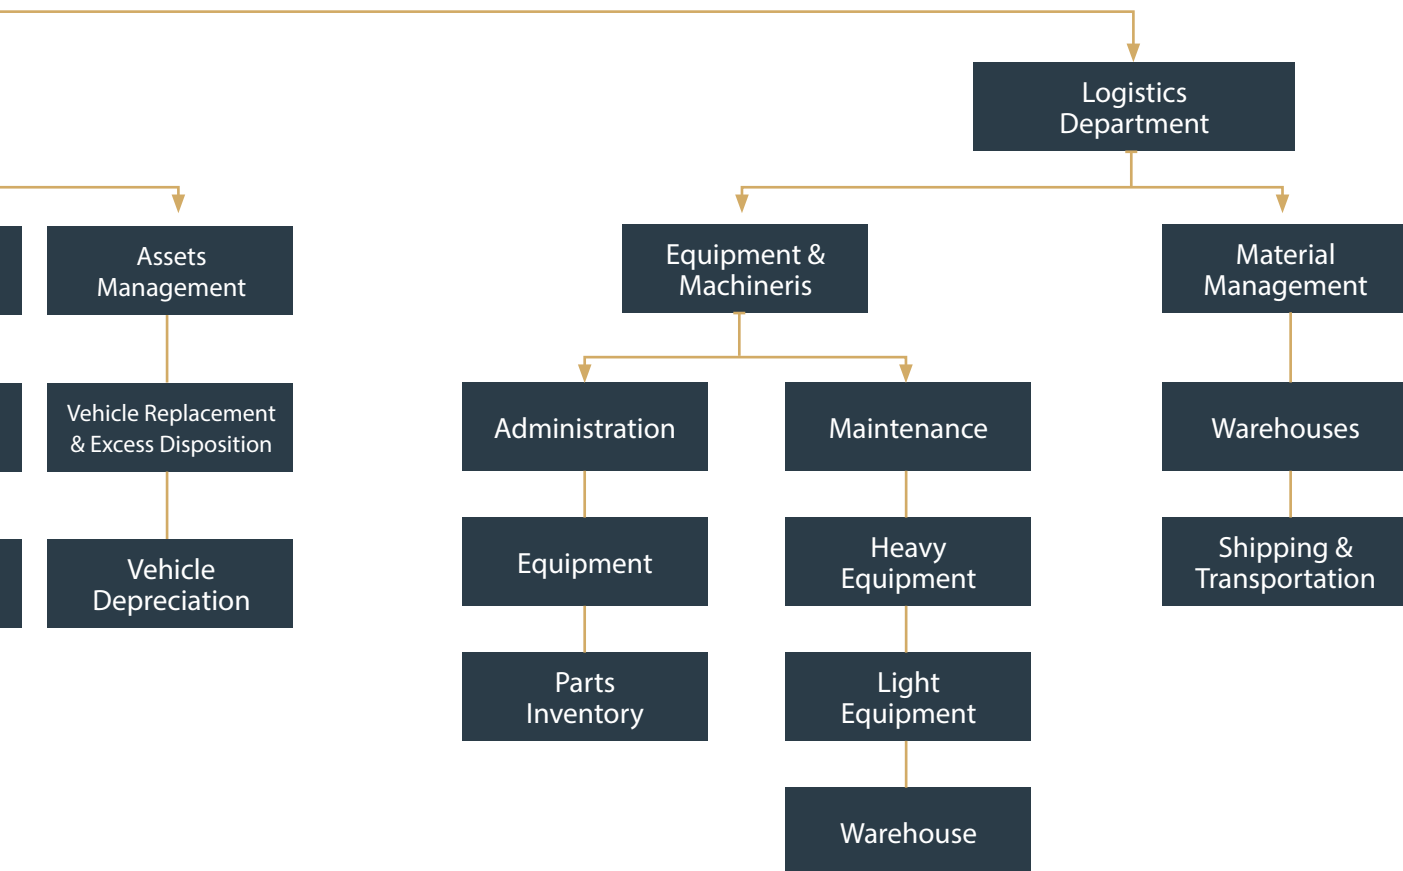

- A wide range of equipment and machinery to help meet your rental requirements.
- Various types of heavy and light vehicles for your transportation needs.
- Our equipment and machinery are used to serve many industries that includes construction, oil field services, events, manufacturing and many more.
- Operations are all over the Kingdom of Saudi Arabia.
- Make sure that your goods are taken care of and get to the proper destination within the specified time.

Our Professional Team

Key to Success

Our keys to success include:

- Strict adherence to Department of Transportation Safety Guidelines. All of our drivers are required to maintain driving logs. Good maintenance is the first defense in promoting good delivery. This ensures that everything is functioning properly.
- Target delivery times that are one hour prior to expected delivery times. We do not overbook. We schedule with integrity and plan routes efficiently.
- Consistent, open communication between drivers and customers. Direct communication provides our drivers with ownership and accountability. From a customer service standpoint, it is this attention to detail that makes our customers feel like they are 1#.
- Drivers that are not overworked. It is our priority to schedule in a way that allow drivers to complete deliveries as well as perform pre- and post- delivery activities – all within their scheduled shift.

Business Strategy

We at Musanadah Transportation Company believe that the key to client satisfaction and being the pioneers of the contracting and construction business in Saudi Arabia requires an effective strategy, ours are:

Establishing a base line for what we aspire to achieve

- Our business objective being to be at the steering wheel of development in Saudi Arabia
- To branch out exponentially ensuring our participation in economical and industrial growth
- To encourage and contribute to the development and economical advances in Saudi Arabia

Establishing an external base line

- Identifying market dynamics and external factors
- Study our competition
- Analyzing the industrial and economical advances and therefore its needs

To stand above the crowd

- Be different
- Be innovative
- Emphasize how we have the competitive edge
- Support and encourage citizenship

Identify and recognize our end goals

- Communicate our vision to our employees
- Clarify our priorities to each and every member of our staff

Review and plan

- Constantly study where we are and where we need to be
- To ensure a learning experience to decrease chances of failure
- Always be in on the market demand and current status

Evaluate and modify

- Adapt in order to overcome any obstacles that may hinder progress
- Setting the stage for change

Quality policy

- Quality in Musanadah Transportation Company never comes by accident; it has always been the result of our high intention, sincere efforts, intelligent directions and skillful executions.
- Provide customers with high quality for Transportation services which meet regiments and are fit for their purpose.
- Enhancing the skills of management and staff through review and actively pursuing an ongoing on-job training, the objective of which is to prepare staff to perform their work more effectively.
- Promote the culture of continual quality improvements and the philosophy of getting things “right first time”. Rigorously controlling the supply, installation and completion to program of all projects.
- Promote the quality management systems and ensuring implementation is achieved by internal auditing, management review, corrective and preventive action.
- Everyone is responsible for the quality within the company and for maintaining high standards.

Safety policy

Providing safe working conditions and maintaining continuity of employment is of continual concern.

We Maintain a safe and healthy workplace for all employees in compliance with all applicable HSE Laws & Regulations.

Our Aim is to promote a positive attitude towards SAFETY and to establish SAFETY & Health objectives for all levels of management and employees.

In this regard, it is important that adequate policies and procedures be developed and adhered to in order to ensure safe,

efficient operating conditions, thereby safeguarding employees and facilities.

Musanadah Transportation Company will not knowingly permit unsafe conditions to exist, nor will it permit employees to indulge in unsafe acts. Violations of Group rules and regulations will result in disciplinary action.

Musanadah believes that the safety of employees and physical property can best be ensured by a meaningful program.
